

# About Me

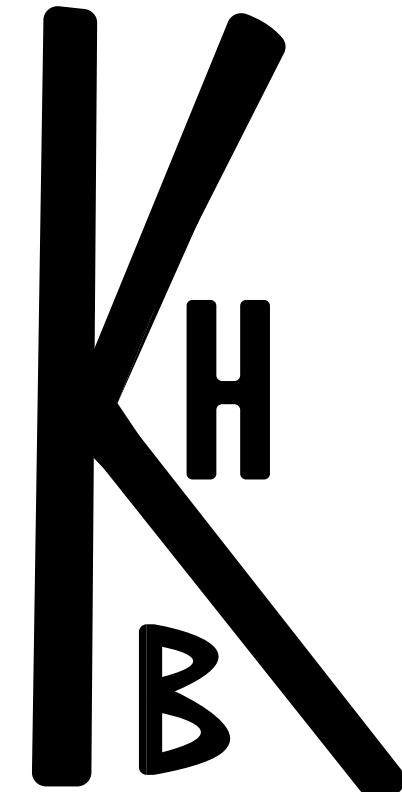

Art, design, and being able to create has always been a passion of mine. I love expressing my style and personality through simple shapes and bright colors. My love for art started when I was very young, I always enjoyed art class and having time to create.

This year at Miami University, I am majoring in Emerging Technologies in Business and Design (ETBD). This major has allowed my creativity to expand with knowledge in photoshop, illustrator, and in coding with html.

In highschool I took classes in art, photography, and graphic design, which gave me a background in design.

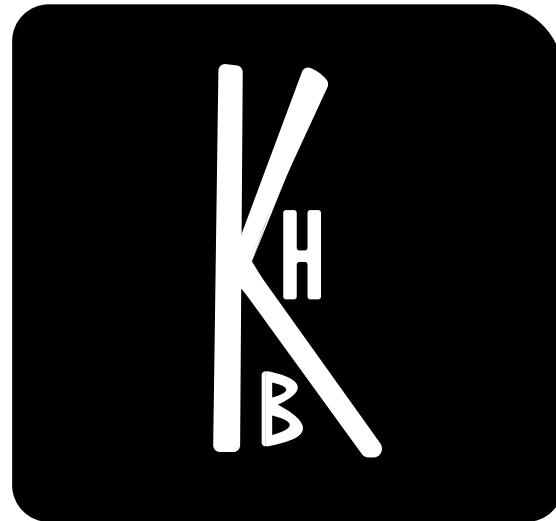

This artwork was created in photoshop. My idea for this work originated by moving and cutting a picture of a guitar. When doing this, I started to get an idea of creating a deer.

**Kendalll Brooke Heinlein**

This image was created using illustrator. This project involved me using the pencil, paint brush, and pen tool to create the design of the ladybug.

This image above of my logo was created using illustrator. I used the pen tool to trace my sketch of my logo. The design of my logo is very simple but clean. The curved ends of the letters gives my logo a fun and younger look. I feel like this logo does a good job of incorporating a font style that exemplifies me.

This image was created in photoshop. When partaking in the toonme challenge, I decided to create a more realistic cartoon version of myself. Using the pen, brush, and elliptical marquee tool I was able to create the lines shapes and colors in the necessary places.

My inspiration for this work was how I would see myself if I was a cartoon. It would look very similar to what I would have drawn of myself as a cartoon. Most of features are similar to my own, but I really wanted my eye to be cartoon like.
